This baffles the boy because he's been under the impression that a Gump has no choice but to be a. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose.. THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Follows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years.. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended.
